AWS has lots of services. You don't need to master all of them. This roadmap only covers an opinionated list of services to help you get started.

Step 1 - Essentials

☐ IAM - Access Control

☐ VPC - Network Layer

☐ EC2 - Compute

Step 2 - Learn these next

☐ S3 - Storage

☐ SES - Emails

☐ Route53 - DNS

☐ Cloudwatch - Monitoring

☐ Cloudfront - CDN

Step 3 - Pick these after

☐ RDS - Managed Database

☐ DynamoDB - NoSQL Storage

☐ ElastiCache - Redis/Memcached

☐ ECS - Containers

☐ EKS - Kubernetes

Step 4 - Serverless

☐ Lambda

☐ ECS Fargate

Best way to learn? Make a simple app and use the services listed above for deployment.

- Sandbox / Sending Limits
- Identity Verification
- DKIM Setup
- Feedback Handling
- Configuration Sets
- Sender Reputation
- Dedicated IP
